

Install Robo Kit Software on Mac

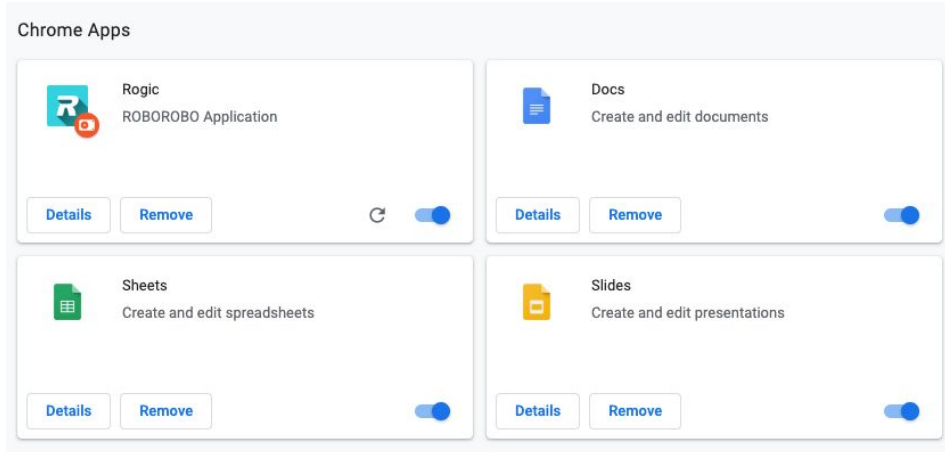

1. Download the software from [here](#).
2. Unzip the downloaded file “ChromeRogic_MAC_v2.zip”.
3. From the unzipped folder, find the “SiLabsUSBDriverDisk.dmg” file and install it.
4. Wait for step 3 installation to finish. Open Google Chrome web browser.
5. Go to <chrome://extensions/> and check the box for Developer mode in the top right to enable developer mode.

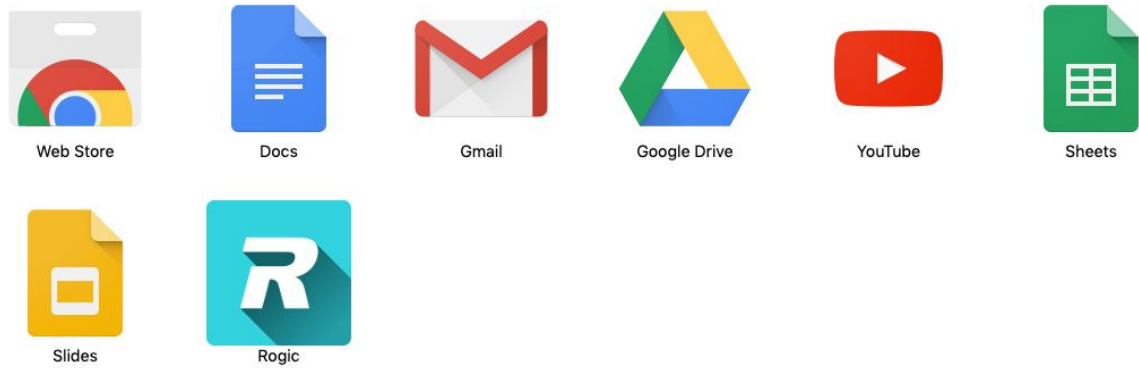

6. From the <chrome://extensions/> page, click the Load unpacked extension button and select the “ChromeRogic_1.0.6” folder in the unzipped file in step 2.

7. When the installation is finished, scroll down and you will see the Rogic app in you Chrome Apps section, now you can disable the Developer mode from the top right corner.

8. Go to <chrome://apps/> and click “Rogic” to launch the app. You may also find it in “Launchpad” of your Mac.
 - a. In Chrome apps

- b. In Mac Launchpad
