

# Install Rogic Software on PC

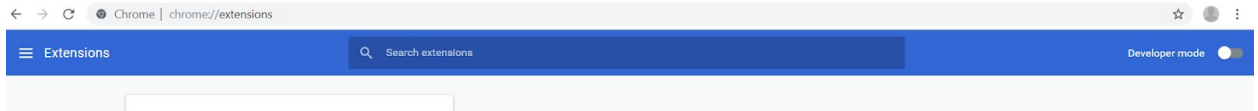

1. Download the software from [here](#).
2. Double click downloaded file “ChromeRogic\_windows.zip”, to extract the files. This will open a new File Explorer Window with a pink “Extract” label on top.
3. Click on the “Extract All” button.

4. Choose a destination - using the default is OK, because you only need the files temporarily.

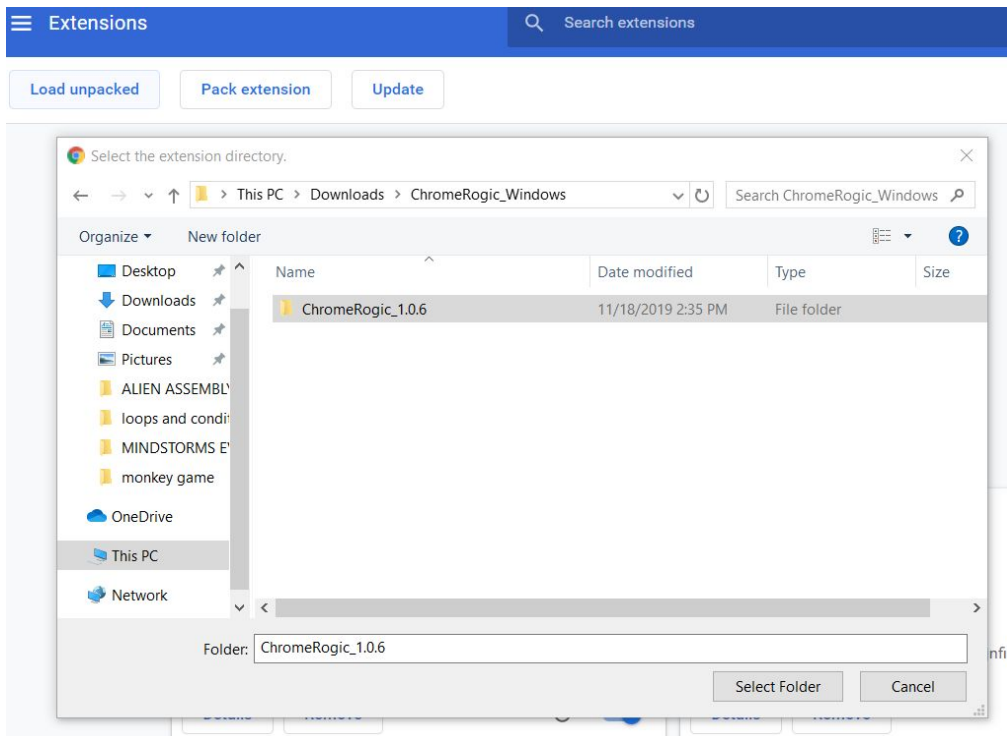

5. Open Google Chrome, and in Chrome's Address Bar type <chrome://extensions> .

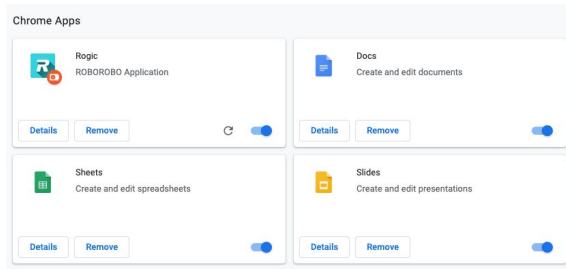

6. On the far right top, check the box for Developer mode. Now there will be 3 buttons below.

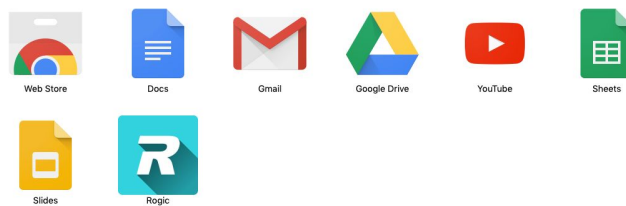

7. Click the Load unpacked extension button and select the "ChromeRogic\_1.0.6" folder that you extracted in steps 2-4.

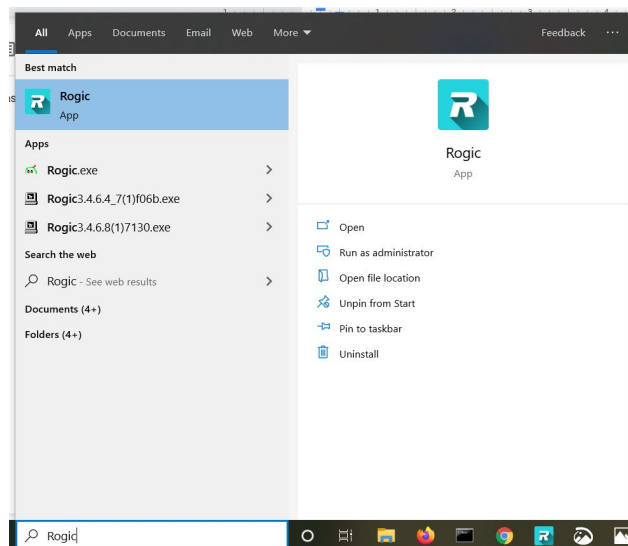

8. When the installation is finished, scroll down and you will see the Rogic app in you Chrome Apps section, now you can disable the Developer mode from the top right corner.

9. To launch Rogic, type to <chrome://apps> in Chrome's Address and click "Rogic".

10. You can also type "Rogic" in the Windows search bar in the bottom left of your screen.

Rogic will also show up in the Windows Start Menu under Chrome Apps
